Career Objective

Motivated MERN Stack Developer with practical experience completing full-stack projects, ranging from small features to fully functional web applications. I specialize in building dynamic user interfaces with React, efficient server-side logic with Node.js and Express.js, and structured data solutions using MongoDB. I focus on writing clean, maintainable code and creating smooth, user-friendly experiences. I am eager to contribute to real-world projects, collaborate with development teams, and continuously expand my skills to become a stronger full-stack engineer.

Skills

Frontend: HTML, CSS, JavaScript, React.js, TailwindCSS, React Router, Axios, TanStack Query.

Backend: Node.js, Express.js, MongoDB, Firebase, Stripe.

Tools & Platforms: GitHub, Postman, VS Code.

Projects:

1. Pulse-

[Live Site](#) | [GitHub \(Client\)](#) | [GitHub \(Server\)](#)

Pulse is a modern blood donation web application that enables users to request blood, donate blood, search donors, manage requests, and support organizations through funding.

Features:

- Implements JWT-based authentication with protected routes and role-based access to ensure data privacy and secure user sessions.
- Supports Admin, Donor, and Volunteer roles with controlled permissions, allowing admins to manage users, roles, and access levels.

Tech Stack: React.js · Tailwind CSS · JavaScript Backend: Node.js · Express.js · MongoDB.

2. TravelEase-

TravelEase is a modern full-stack vehicle booking platform designed to make renting, listing, and managing vehicles effortlessly.

Features:

- Users can add, update, and delete their own vehicle listings with full CRUD functionality, ensuring complete control over their rentals.
- Authenticated users get a personalized experience with "My Vehicles" and "My Bookings" pages, showing only their added cars and booked rides.

Tech Stack: React.js · Tailwind CSS · Node.js · Express.js · MongoDB · Firebase

3. WarmPaws-

A complete pet care experience with easy navigation, winter pet services, secure login, and simple online booking.

Features:

- Special seasonal care designed to keep pets warm, healthy, and comfortable during the winter months, including grooming, checkups, and protection tips.
- Convenient online booking that lets users schedule appointments anytime. Fast, flexible, and accessible from any device.

Tech Stack: React.js · Tailwind CSS · Node.js · Firebase · React Router
