Career Objective:

Motivated **MERN Stack** Developer with practical experience completing **full-stack** projects, ranging from small features to **fully functional** web applications. I specialize in building dynamic user interfaces with **React,** efficient server-side logic with **Node.js** and **Express.js**, and structured data solutions using **MongoDB**. I focus on **writing clean, maintainable code** and **creating smooth, user-friendly** experiences. I am eager to contribute to real-world projects, collaborate with development teams, and continuously expand my skills to become a stronger **full-stack** engineer.

Technical Skills:

Frontend – HTML, CSS, JavaScript, React.js, TailwindCSS, React Router, Axios, TanStack Query.
Backend – Node.js, Express.js, MongoDB, Firebase, Stripe.
Tools – GitHub, Postman, VS Code.

Projects:

1.TravelEase: Live Site | GitHub (Client) | GitHub(Server)

TravelEase is a modern full-stack vehicle booking platform designed to make renting, listing, and managing vehicles effortlessly.
Features:
- Users can add, update, and delete their own vehicle listings with full CRUD functionality, ensuring complete control over their rentals.
- Authenticated users get a personalized experience with "My Vehicles" and "My Bookings" pages, showing only their added cars and booked rides.
- All vehicle and booking information is stored and fetched in real time, ensuring fast and reliable data handling across the web.

Tech Stack: React.js · Tailwind CSS · Node.js · Express.js · MongoDB · Firebase

2.WarmPaws: Live Site | GitHub (Client)

A complete pet care experience with easy navigation, winter pet services, secure login, and simple online booking.
Features:
- Special seasonal care designed to keep pets warm, healthy, and comfortable during the winter months, including grooming, checkups, and protection tips.
- Convenient online booking that lets users schedule appointments anytime. Fast, flexible, and accessible from any device.
- A safe and protected user authentication system that keeps personal information secure while providing quick access to all services.

Tech Stack: React.js · Tailwind CSS · Node.js · Firebase · React Router

Education:

Bachelor of Science in **Computer Science and Engineering**
University: National University   (2023-2027)

Language:

Bangla (Native), English, Hindi.
